CRD: Callback endpoints only. We need to understand your: 1) Specific IG requirements that may differ from standard and 2) Supported IG version and Hooks

DTR: Callback endpoints only. We support both, while preferring upfront sharing of full questionnaires to advance workflow integration. We need to understand your: Example outputs of Payer supported questionnaire type (standard, adaptive, both)

PAS: Callback endpoints only. We need to understand your: 1) Test data for connectivity and scenarios-based testing; 2) Specific IG requirements that may differ from standard; and 3) Support of: Inquiry, subscription, CDex, additional information response.

Items needed from Payer: 1) Credentials; 2) Contract, terms and conditions agreements, any other form of agreement that as a FHR Vendor we would need to agree to for non-Production and Production access to dev tools/portals and connectivity; 3) Test data for connectivity and scenarios-based testing; 4) Contacts for initial kick off from a PM and Engineering lead perspective; and 5) Payer specific IG requirements that may differ from standard.
