

The WEDI Property and Casualty Workgroup have identified the following 5 ICD-10 State Readiness Scenarios for workers' compensation:

- **Scenario 1:** States that have adopted ICD-10 regulations with the effective date of Oct 1, 2015
- **Scenario 2:** States that have pending ICD-10 regulations with no defined effective date when these regulations will be finalized
- **Scenario 3:** States that have adopted ICD-10 however only for specific Claim Types Identified
- **Scenario 4:** States that are not adopting ICD-10 as it is not relevant to their regulations/ fee schedule and or are allowing voluntary adoption. In this scenario most states highly recommend stakeholders support ICD-10
- **Scenario 5:** States that do not have statute authority to regulate the use of International Classification of Diseases codes. In this scenario the CD-10 determination is to be made by the individual payer for that state.

We have provided an excel worksheet to allow you to sort and filter on the different scenarios that are applicable to your business. This is a living document and will be updated as new information is presented. We would highly advise that if you are not already signed up on the WEDI P&C listserv, to signed up to receive ICD-10 regulatory alert updates. Please know that you will need to confirm the scenario status with your state, payers and or vendors to ensure you have the most recent information.
