MAIN CONFERENCE SESSIONS

8:30 - 9:00 am Registration (Marco Polo Ballroom Foyer) and Breakfast (Galileo Ballroom)

9:00 - 9:15 am WEDI Chairman-Elect, Jean Narcis - Morning Remarks ★ Marco Polo Ballrooms (705-805) For All GENERAL SESSIONS★

9:45 - 10:45 am GENERAL SESSION 4 - Planning for Consumerism and New Technology: Impacts on the future of our Nation’s Healthcare - Robert Bass, Vice President & Distinguished Analyst, Healthcare Industries Research, Gartner, Inc. - The healthcare industry lags behind other industries such as retailing, banking and travel as examples of consumer empowerment. This session looks at the challenges of business model structure, analytics design and big data enablement as tools to transform health technology.

10:45 - 11:15 am Refreshment Break, Exhibit Viewing and Networking (Galileo Ballroom)

11:15 am - 12:15 pm GENERAL SESSION 5 - Provider/Payer ICD-10 Collaboration - Lessons Learned and Tips for the Industry - Jan Ronneet, Vice President, WellPoint and Catherine Menick, Finance Director, St. Joseph Health - Payer/Provider collaboration has proven to be invaluable in shepherding legitimate shifts in reimbursement as well as errors in system rennovation. The presentation will explore real world details about where to focus and what steps providers and payers can take together to produce this value. St. Joseph Health System and WellPoint independently identified the potential for legitimate shifts in reimbursement with ICD-10 as well as unwanted errors in billing and claim adjudication caused by ineffective system configuration, and both organizations jointly uncovered value in working under a defined collaborative approach to testing. This 'collaboration' includes sharing insights related to the controls used in translating between ICD-9 and ICD-10 for purposes of system rennovation, but more importantly this collaboration includes sharing real ICD-10 claims through a defined testing process. This collaborative testing serves legitimate shifts in reimbursement and the associated transparency is used to increase awareness of corporate continuity after the compliance date. In 2012, the speakers talked about the concepts of and plans for this collaboration. The 2013 version of the presentation walks through the results of a year of testing together and provides a blueprint against which other organizations can execute.

12:15 - 1:30 pm Lunch and Networking (Galileo Ballrooms)
